

# GOLF GREEN MACHINE

# 25"

## FOR THE PERFECT GOLF & CRICKET PITCH

The Professional™ Golf Green Machine has been designed to specifically meet the unique demands of professional green keepers. This machine is perfect for various sports application including golf tees, bowling greens and cricket pitches.

The self-propelled design makes light work of most sloping greens, while the smooth rear rollers ensure that you always get the perfect looking cut.

Heat treated blades mean fewer chips that might spoil the even cut and separate clutches on the rear roller and cylinder ensuring maximum flexibility.

The Professional™ Golf Green machines are supplied with transport wheels which allow for easy transport and storage.

Golf green machines are designed to reach difficult areas on golf courses, including between the greens and bunkers.

### CYLINDER MOWER - MODEL 25"

<b>Recommended blade</b> <i>All blades are available in 9 or 12 blades on request</i>	9
