

STIHL® 16

CHAINSAW OPERATORS' TROUSERS

In the absence of a Government gazetted standard for chainsaw trousers the STIHL 16 has been relied upon for many years to provide a good basic level of cut protection. In recent years many local forestry companies have adopted the European 20m/s standard, and to get the maximum cut protection we would recommend using our STIHL 20m/s trousers.

SAFETY

HOLISTIC PRODUCT

- The chain clogging pad offers good protection, & it is light and cool, minimising operator fatigue.

COVERAGE

- The chain clogging pad extends from hip to ankle & fully encloses the calf from knee to ankle.

VALUE

THIS PRODUCT IS:

EFFECTIVE and DURABLE
LIGHT and COMFORTABLE
ECONOMICAL

A great combination in the South African climate.

DURABILITY

POLYCOTTON WORKWEAR

- 65% Polyester and 35% cotton outer combines max. strength with the cooling qualities of cotton.

CLIMATE CONTROL NYLON

- Protects the chain clogging pad from brambles, oil & water.

- Light weight to facilitate air flow/reduce heat.

Protective tape around the hem prevents boot wear.
A double layer of fabric reinforces the seat area.

QUALITY

The best chain clogging fabric, polycotton work wear, YKK zipper, nickle press stud, high tension thread etc. are used in this garment.

Made in an ISO 9001 factory.
